

Paxton Access

## Company Profile

### About Paxton

---

Paxton Access Ltd is a leading manufacturer of electronic access control systems.

Established in 1985, we are based in East Sussex in the UK. Our Group Chairman Tony Ratcliffe is the owner, Adam Stroud is our Group Chief Executive, and a highly skilled board of Directors oversee the smooth running of the business. From its inception Paxton has aimed for engineering excellence. This means designing and manufacturing intelligent and innovative products that are fit for their purpose.

We have become a market leader through our constant efforts to exceed the expectations of installers and system users.

The company has been profitable and enjoyed considerable growth every year since 1993. Paxton Access Ltd is a stable company. We have a sound investor and offer stability in the long term.

## Product Ranges

### Paxton Product Ranges to suit every Client

Paxton manufacture different ranges to suite each Clients requirements.

- **Net2 Range** - *(High Security)*  
Advanced PC Based Access Control Solution, all readers may be networked and centrally managed.
- **Compact Range** - *(Low Security)*  
Compact Stand-alone Readers with a simple process to add/remove cards. Ideal for low level doors, there is no Networking or central management hence no PC requirement.
- **Switch2 Range** - *(High Security)*  
Readers connected to Stand-alone Controllers with a simple process to add/remove cards. Ideal for high level doors, without the need for Networking or central management hence no PC requirement.
- **Net10 Range** - *(High Security)*  
Complete Security Systems Management with Central and Remote management. Integrates with existing systems on-site including Access Control, CCTV Video Surveillance, Intruder Alarm & Fire Alarm.

Paxton Access

## Net2 Range

### Net2 Range for High Level Doors, Centrally Managed

Net2 is an advanced PC based access control solution. Net2 offers centralised administration and control of sites from one to hundreds of doors and with up to 50,000 users. Perfectly tailor access privileges to groups or individuals quickly and easily using our intuitive, user-friendly software. Event reports can be generated in a few clicks and the single-door architecture makes specifying, installing and maintaining the system easy. Advanced features such as site graphics, IP camera integration and 'Triggers and Actions' further extend the capabilities of this cutting-edge system.

#### Key features

- PC based system
- Central control of privileges
- Manage 100s of doors, 10,000 users
- Event reporting
- Scalable; add to systems easily
- Integrate other building systems
- Proximity, magstripe or keypads

#### Typical applications

- Small/medium premises
- Large corporate premises
- Multiple-site premises
- Government buildings
- Universities
- Sports clubs
- Car parks

- Paxton Net2 Proximity / Mifare / HID Readers
- Paxton Net2 Combined Keypad & Proximity Reader
- Paxton Net2 Long Range Proximity & Wireless Reader
- Paxton Magnetic Swipe Reader
- Paxton Proximity Card / Fob
- Paxton Swipe Card
- Paxton Wireless Transmitter Fob
- Paxton Net2 IP Intercom Panel (with Camera, Prox'Reader, Keypad)
- Paxton Net2 IP Monitor with Handset
- Paxton ACU (Access Control Unit) Door Controller (RS485/TCP-IP)
- Paxton Net2 Quad Band GSM Caller ID Reader
- Paxton Net2 Software (Lite or Pro)
- Paxton Net2 I/O Board (for Inputs/Outputs Management)

Paxton Access

## Compact Range

### Compact Range for Low level Stand-alone Doors

An ideal standalone access solution for internal (low security) doors. A compact system comprises an integrated reader and control unit, which are quick and easy to install: simply connect to a power supply and a lock. Simple token management using our card packs makes administration of the system very easy. Compact systems are available in proximity, magstripe and keypad variants, and are ideal for smaller sites.

#### Key features

- Integrated control unit and reader
- Simple token management
- Scalable; add to systems easily
- Proximity, magstripe or keypads

#### Typical applications

- Small business premises
- Sports clubs
- Any low-risk internal door
- Apartment complexes
- Storage units

Paxton Access

## Switch2 Range

### Switch2 Range for High level Stand-alone Doors

Switch2 is a standalone product suitable for external use in applications requiring high levels of security. Comprising a separate control unit and reader (the control unit is installed in a safe area to avoid tampering), Switch2 systems are a scalable, easy-to-manage access solution ideal for small to medium sites. Switch2 uses the same ingenious token management system as the compact system, and is also available with proximity, magstripe and keypad variants.

#### Key features

- Separate control unit and reader
- Simple token management
- Scalable; add to systems easily
- Proximity, magstripe or keypads

#### Typical applications

- Small business premises
- Sports clubs
- Schools
- Apartment complexes
- Storage units
- Sites requiring high security
- Carpark barriers

Paxton Access

## Net10 Range

net10

### Net10 Range for High level Security Systems Integration

Net10 is an Out-of-the-Box Security Management System for complete control of your Buildings Security systems and more. A web user interface provides you with incredible control of your Access Control, Gate / Barrier Automation, IP Video Surveillance, Intruder Alarm & Fire Alarm systems. It is also possible to integrate with other Buildings management systems such as Lighting, Heating & Air Conditioning.

The Systems can be easily controlled via a Computer, Tablet or Smartphone from within the building or remotely when off-site.

#### Key features

- Central Management of Security from one App
- Simple to use interface
- Energy efficient Hardware
- Completely Scalable System
- Proximity, keypads or via Bluetooth phone

#### Typical applications

- Hotels & Restaurants
- Office Blocks
- Commercial Businesses
- Retail Stores
- Premises with Multiple Security Systems
- Buildings operating multiple partitions
- Remotely Monitored Systems
- High Security Sites
